Why North American Concrete?

North American Concrete is a certified swim spa installer for pool and spa companies across Ontario. We have our own spa pad installation division that focuses only on the swift and effective installation of up to 8 of these spa pads a day. Our team works closely with the specifications on structural pads that are designed to hold tonnes of weight and last the test of time. We back this with our 25-year spa pad warranty.

Considering Stamped Concrete?

Stamped or decorative concrete can give your spa/hot tub pad, pool deck, stairs, driveway or patio the look of slate, tile or natural stone, without the negative results of deterioration or poor lifespan for your investment. Coming in a variety of stamps and colours to choose from stamped concrete can enhance the look of any surface and is easy to maintain once installed. Pleasing to the eye and durable, it's no wonder that more and more people are turning towards stamped concrete as their long term solution for a variety of concrete projects.

Require additional 12" x 2"	Dependent on pad choice
-----------------------------	-------------------------

Electrical Conduit Trenching

18" deep per section	\$495
----------------------	-------

FAQ

How much space do I need for access with machinery to our backyard?

Our equipment is specialized for residential applications and only requires 38" to get in and out of tight gates and paths. Should the gate be less, we can remove a section of fence or post and replace afterwards.

Is the price firm or are there any potential increases when viewing the property?

We guarantee our prices for our distributing clients. Our pricelist is firm unless the hot tub or swim spa pad is going on an unlevel area. This requires us to elevate the pad until it is level which requires more concrete thus increasing costs. All pricing is plus HST.

Do you guarantee your work? If so, for how long?

Our work comes with a standard 25-year warranty for our products which can be printed off our website at <https://na-concrete.com/warranty>
